Astra Contract Renewal

Colorpak is pleased to advise that AstraZeneca has informed us of its intention to renew its contract for the supply of folding cartons for a further two years.

Astra has separately informed its suppliers of its decision to:

1. consolidate certain products to other manufacturing sites within its global supply network, with the transfer commencing in quarter three of 2010 and being phased over the subsequent two years; and
2. sell its North Ryde manufacturing facility with its remaining volumes.

Astra's decision may impact on Colorpak's results from 2011 however it is far too early to accurately predict the effect and the company considers there is ample time to secure replacement business.
